

My HealtheVet

Capabilities Enhancement Master Cloud

"I have total confidence that whatever security risks the MHV program has and any A&A work is required, the MHV Security team always gets the job done correctly, and go above and beyond to ensure the MHV program is secure."

- Joe DeCoteau

Business Requirements Division
Information System Security
Officer

By Light is the original Master Cloud contractor and has a unique experience migrating the MHV systems and their many integration points.

By Light provided technical services and operational support to the My HealtheVet (MHV) Master Cloud environment including:

- Migration support of the Austin Information Technology Center (AITC) production MHV Platform to the new cloud hosted environment with uninterrupted availability and Continuity of Operations Plan (COOP) for all existing MHV applications, features, and services;
- Implementation of the MHV cloud system; and
- Ongoing technical support to maintain the environment.

The migration involved multiple environments, systems and with thousands of network connections. It was performed without any severe issues, minimal down time, and very light customer impact.
