

## **BY LIGHT FORMS ALLIANCE WITH CYBRAICS INC., STRENGTHENING CYBERSECURITY CAPABILITIES**

*Partnership with a focus on reinforcing healthcare information security*

Arlington, VA (March 5, 2018) - By Light Professional IT Services LLC (By Light) is excited to announce a strategic alliance with Cybraics Inc., adding security analytics and artificial intelligence “as a service” to By Light’s portfolio of cybersecurity and compliance capabilities.

By Light, a HITRUST CSF Assessor Organization and leading provider of secure government and commercial IT solutions, is incorporating proven Department of Defense security tools and techniques as part of the HITRUST Common Security Framework (CSF) Assessments for the commercial healthcare market.

“Our strategic alliance will focus on advancing healthcare information security and data breach protection for both the U.S. Government and commercial HIPAA Covered Entities and Business Associates,” says Bob Donahue Jr., CEO of By Light. “Integrating Cybraics into our assessments and managed security services adds Artificial Intelligence (AI) with machine learning as a force multiplier to rapidly identify anomalies in behavior, evaluate the potential for a cybersecurity attack in progress or lying in wait, and responding quickly to mitigate threats before a data breach, fraud or abuse occurs.”

Please visit us in Booth #11015 at the 2018 HIMSS Conference & Exhibition in Las Vegas, NV to learn how By Light and Cybraics can help your healthcare organization protect against cybercrime and achieve compliance.

### **About By Light Professional IT Services LLC**

Founded in 2002, By Light ([www.bylight.com](http://www.bylight.com)) is an ISO 9001, 20000, 27001, HITRUST CSF Assessor, and CMMI Dev 3 registered and certified organization, providing a full range of professional services, hardware, and software engineering solutions to defense, civilian, and commercial customers worldwide.
